**To:** All Candidates for Part I Examination in Materials Science  
2021/22

**From:** Professor Jason Smith, Chair of Examiners 2022.

**Subject:** Examinations Trinity 2022

**Date:** Tuesday, 08 March 2022

**cc:** Tutors, Director of Undergraduate Studies

---

## Content of Materials Courses for Examination in Trinity 2022

During the course of your studies, lecturers may have identified material that was issued for background information only and would therefore not be deemed to be examinable. To ensure that clear, consistent and accurate guidance is given about this material, I am issuing, as Chair of Examiners, a statement summarising any such declared material.

To clarify, the examinable material is defined broadly by the course synopses and includes all material covered in lectures and all material covered in course handouts of any type (including problems sheets issued by the lecturers). The only exceptions to this rule are:

- (i) If a course handout states in writing that the material below is for background information only and is non-examinable
- (ii) Notification by the Chair of Examiners to all students taking the course indicating that a specific part of the course is non-examinable.

In the annex to this letter, we have identified the specific material in the **Materials Science** courses which is deemed to be non-examinable in 2022. Material already labelled as non-examinable on handouts issued by the course lecturer is not listed.

**Candidates are reminded that in order to preserve the independence of the examiners, you are not allowed to contact them directly about matters relating to the content of the exams.** Therefore, if there are any queries about the content of this statement, please address these to Eleanor Thornton.

Yours sincerely,

Professor Jason Smith

## **Annex to letter from the Chair of Examiners**

### **Non-examinable material for 2022 FHS Examinations**

- 1) Any material on a page of a course handout where that page was identified by the course lecturer in writing on the page as 'non-examinable material'
- 2) 3<sup>rd</sup> Year Option Lectures:
  - a) Magnetic and Superconducting Materials – Prof. L. Bogani
    - The contents of Notes 12 will not be examinable material.
